Acknowledgments

The Tanzania Institute of Education (TIE) would like to acknowledge the contributions of all organisations and individuals who participated in designing and developing this textbook for Arts and Sports. In particular, TIE wishes to thank the University of Dar es Salaam (UDSM), The Open University of Tanzania (OUT), the School Quality Assurance Department, teachers' colleges and primary schools. Besides, the following individuals are acknowledged:

Translators: Mr Given A. Mbakilwa (TIE), Mr Mbezi S. Benjamin (TIE), Ms Debora J. Mironjo (TIE), Mr Peter O. Kazeni (TIE), Mr James Payovela (TIE), Mr Erick K. Papian (UDSM) & Mr Juma M. Masine (Dakawa TC)

Editors: Dr Cyprian N. Maro (UDSM), Dr Daines N. Sanga (UDSM), Mr Beatus J. Nsiima (OUT), Mr Victor K. Mutalemwa (SQA Tabora) & Mr Aaron J. Mweteni (SQA Morogoro)

Designer: Ms Mariam A. Matotola

Illustrators: Mr Fikiri A. Msimbe (TIE), Mr Yohana P. Mwenda and Mr Gwakisa U. Mwandoloma

Coordinator: Mr Given A. Mbakilwa (TIE)

TIE also appreciates contributions from the primary school teachers and pupils who participated in the trial phase of the manuscript. Likewise, the Institute would like to thank the Government of the United Republic of Tanzania for facilitating the writing and printing of this textbook.

Dr Aneth A. Komba
Director General
Tanzania Institute of Education

Introduction

This textbook, Arts and Sports is written specifically for Standard Four Pupils in mainland Tanzania. This book has been prepared according to the Arts and Sports syllabus issued by the Ministry of Education, Science and Technology in 2023. Some of the themes in this book have been taken from the previous book Vocational Skills Standard Five published in 2018 by the 2016 syllabi.

This book has seven chapters, which are Acting, Singing and musical instruments, Drawing, Clay modelling, Physical exercises, Traditional and modern games, Art exhibitions, performances and sports competitions. By learning its contents, you will master the basics of singing and acting, drawing pictures, and modelling various shapes. You will also manage physical exercises, play traditional and modern games, and participate in arts exhibitions, performances and sports competitions.

The contents of these chapters are presented in the form of text, activities, interesting pictures, and exercises. Therefore, perform all the tasks in this book and other tasks that the teacher will provide. This will enable you to develop the knowledge and skills intended.

Additional learning resources are available in the TIE e-Library at *https://ol.tie.go.tz* or *ol.tie.go.tz*

Chapter One

Acting

Introduction

Acting is one of the elements in the performing arts that conveys messages to society using words and actions. In this chapter, you will learn how to practise body movements, emotions, and sounds to act out living and non-living things. The competencies developed will enable you to perform various plays to educate and entertain the community skilfully and confidently.

Think

Body movements in acting

Acting practices

Acting practices include the preparation of various physical and mental techniques. An actor prepares him or herself to develop and understand the behaviour and feelings of the role of the character he or she has to assume in a play. This makes the acting even better. Acting practices include body movements, acting various emotions and voice projection.

Body movement practices in acting

Body movements in acting are the way an actor uses his or her body to convey messages without words. Body movements are also referred to as body language. Body movements include mime, gestures,

FOR ONLINE READING ONLY
www.wazaelimu.com

postures and facial expressions. Examples of body movements are such as walking, standing or dancing. Body movements are one of the ways used to convey a message in the performing arts. An actor can use body movements to express emotions such as happiness, sadness, fear or confidence. Performing arts such as acting and dance often use body movements to communicate message to the audience.

Examples of body movements in acting

Body movements in acting help the actor to make the audience understand his or her role and the message. The following are examples of body movements in acting:

(a) Standing upright. When an actor stands upright with his or her chest forward, he or she may be showing confidence, authority, power or courage;

(b) Facing down. When the character turns down his or her face or eyes, shows the actor's feelings of anxiety, fear, shame, guilt, or weakness;

(c) Folding the arms on the chest. These movements show that the character is defensive, not ready to talk or has feelings of doubt. Also, these movements can indicate the anger or harshness of the character;

(d) Walking quickly with short steps. In acting this shows anxiety, fear or hurry. The character shows that he or she has many things on his or her mind or tries to run away from a certain situation or event;

(e) Nodding the head gently. In acting, this can show acceptance or agreement to something. When someone quietly nods his or her head, indicates his or her agreement with another person's idea or suggestion;

FOR ONLINE READING ONLY
www.wazaelimu.com

(f) Gazing eyes. When the actor makes such eye movements, he or she shows surprise, fear, disbelief at something or something that happened;

(g) Holding the head with both hands. These movements can indicate sadness or shock. It can show a character who is worried or who is going through a lot of suffering; and

(h) Raising shoulders and lowering hands. When an actor makes these movements, he or she shows a lack of concern, acceptance of failure or doubt. Also, it can indicate a character's surrender to a certain situation.

Activity 1

Practise body movements to express inner emotions such as happiness, sadness, anger or anxiety.

Using body movements to act out living and non-living things

Body movements can be used to imitate the behaviour, motions and emotions of living and non-living things through actors' bodies. To imitate living and non-living things using body movements, it is better to consider the following issues:

(a) Observing the behaviour of the character you want to imitate to see how the character walks, sits, eats, or even defends oneself. You can use ICT to find videos or pictures of the characters and carefully observe their movements;

(b) Understanding the body of the character you want to act. It is necessary to observe the body structure of the character. If you imitate an insect consider the number of legs, wings, and how those parts relate to each other. Also, it is good to consider the weight of the character imitated such as how heavy or light the character is, because weight can affect how the character moves;

FOR ONLINE READING ONLY
www.wazaelimu.com

(c) Imitating the movements of the character you want to act. Learn how to walk like the character. Properly imitate the movements of the character, and study his or her characteristics carefully such as the way the character walks, the use of sound and the state of silence or noise;

(d) Using body language to show the emotions of the character such as fear, happiness or anger. For example, a fearful character may move backward or shiver. Also, use the eyes and face to express emotions, for example, the eyes can show attention, fear or love;

(e) Practising regularly to get into the behaviour of the character until your body can show the movements easily; and

(f) Using props and costumes to show well the characteristics of the character you want to portray. Shapes that match the character's appearance can help make your movements look real.

Examples of acting the body movements of living things

The following are some examples of body movements of living things:

1. Acting the movements of an elephant. Stand with your arms unfolded like an elephant's trunk, bend forward, and then rise like an elephant does to do different activities using its trunk;

2. Acting the movements of a frog. Squat and jump like a frog from one place to another;

3. Acting the movements of a giraffe. Raise your arms like a giraffe's neck and walk majestically like a giraffe; and

4. Acting the movements of blooming flowers. Squat down and bend up like a seed and then slowly begin to unfold while standing like a flower blooming.

FOR ONLINE READING ONLY
www.wazeliru.com

Activity 2

Use body movements and voice to act the movements of a cat, monkey, chicken and lion.

Examples of acting movements of non-living things

1. Acting the movements of a bicycle. Using your hands and feet, hold your hands in front of you as if you are holding the handlebars of a bicycle. Bend your knees slightly and start moving your feet as if you are pedaling. Using your body, lean slightly forward and turn your body side to side as if you are steering a bicycle;

2. Acting the movements of a car. Hold your hands in front of you as if you are holding a car steering wheel. Turn the steering wheel with your hands as if you are steering a car. Use one foot as if pressing the gas pedal and the other for the brake pedal;

3. Acting the movements of a motorcycle. Hold your hands in front of you as if you are holding the handlebars of a motorcycle, then using your feet, kick as if you are starting the motorcycle. Turn the handlebars with your hands and start rotating your hands as if you are steering a motorcycle. Lean slightly forward and turn your body side to side as if you are steering a motorcycle; and

4. Acting the movements of the stone. Hold your hand as if you have held a stone of a size that can be moved using your legs. Put it down and use your leg to make it move from one point to another.

FOR ONLINE READING ONLY
www.wazaelimu.com

Similarly, you can imitate the movements of other things such as:

1. The flow or movements of a river. Walk slowly while swaying your hands like the motion of water waves;

2. The movements or motion of the wind. Stand upright and move your arms left and right to mimic the blowing of the wind; and

3. The movements of the rain. Stretch out your arms, then use your fingers and palms to imitate the falling of the raindrops.

Activity 3

Use body movements and voice to act the movements of any non-living thing.

Importance of body movements in acting

Body movements are very important in acting because they help the actor to:

(a) Express inner emotions such as happiness, sadness, anger or anxiety that cannot directly be shown through words. For example, holding the cheek can express sadness even without words;

(b) Add reality to acting. When the actor uses the correct body movements, the audience can believe and understand more of what is being performed;

(c) Communicate with the audience. Body movements are also used to convey messages and feelings to the audience, especially if there are no spoken words; and

FOR ONLINE READING ONLY
www.wazelimu.com

(d) Indicate future actions or give clues to the audience about what is nearly to happen in the play. For example, an actor taking a step back can indicate fear or preparation for a certain situation.

Exercise 1

1. Identify the benefits of practising body movements in acting.
2. Mention some steps you will follow when acting out the various animal movements.

Emotional practices in acting

Emotional practices are exercises that help the actor understand, explore and manage various emotions effectively in acting. Emotions play a major role in conveying the behaviour and situations of characters in plays. Examples of emotions are happiness, sadness, anger, fear, surprise, shame, hate, love and jealousy. An actor can practise emotional exercises in various ways, including emotional memory and practices of laughing or crying.

Emotional memory. An actor can use emotional memories from events in his or her own life. This helps to arouse the emotions required when acting out a certain character. This technique helps the actor bring reality into the performance. Often these feelings come from his or her personal experiences.

Activity 4

Think about an event that brought great joy or sadness in your life. Then use actions to show the feelings you have thought.

The practices of laughing or crying. Such practices help an actor to arouse and manage emotions effectively. Laughing and crying are normal emotions, but they can be challenging to portray realistically

FOR ONLINE READING ONLY
www.wazaelimu.com

in acting. An actor can laugh or cry in a low or high voice, as shown in Figure 1.

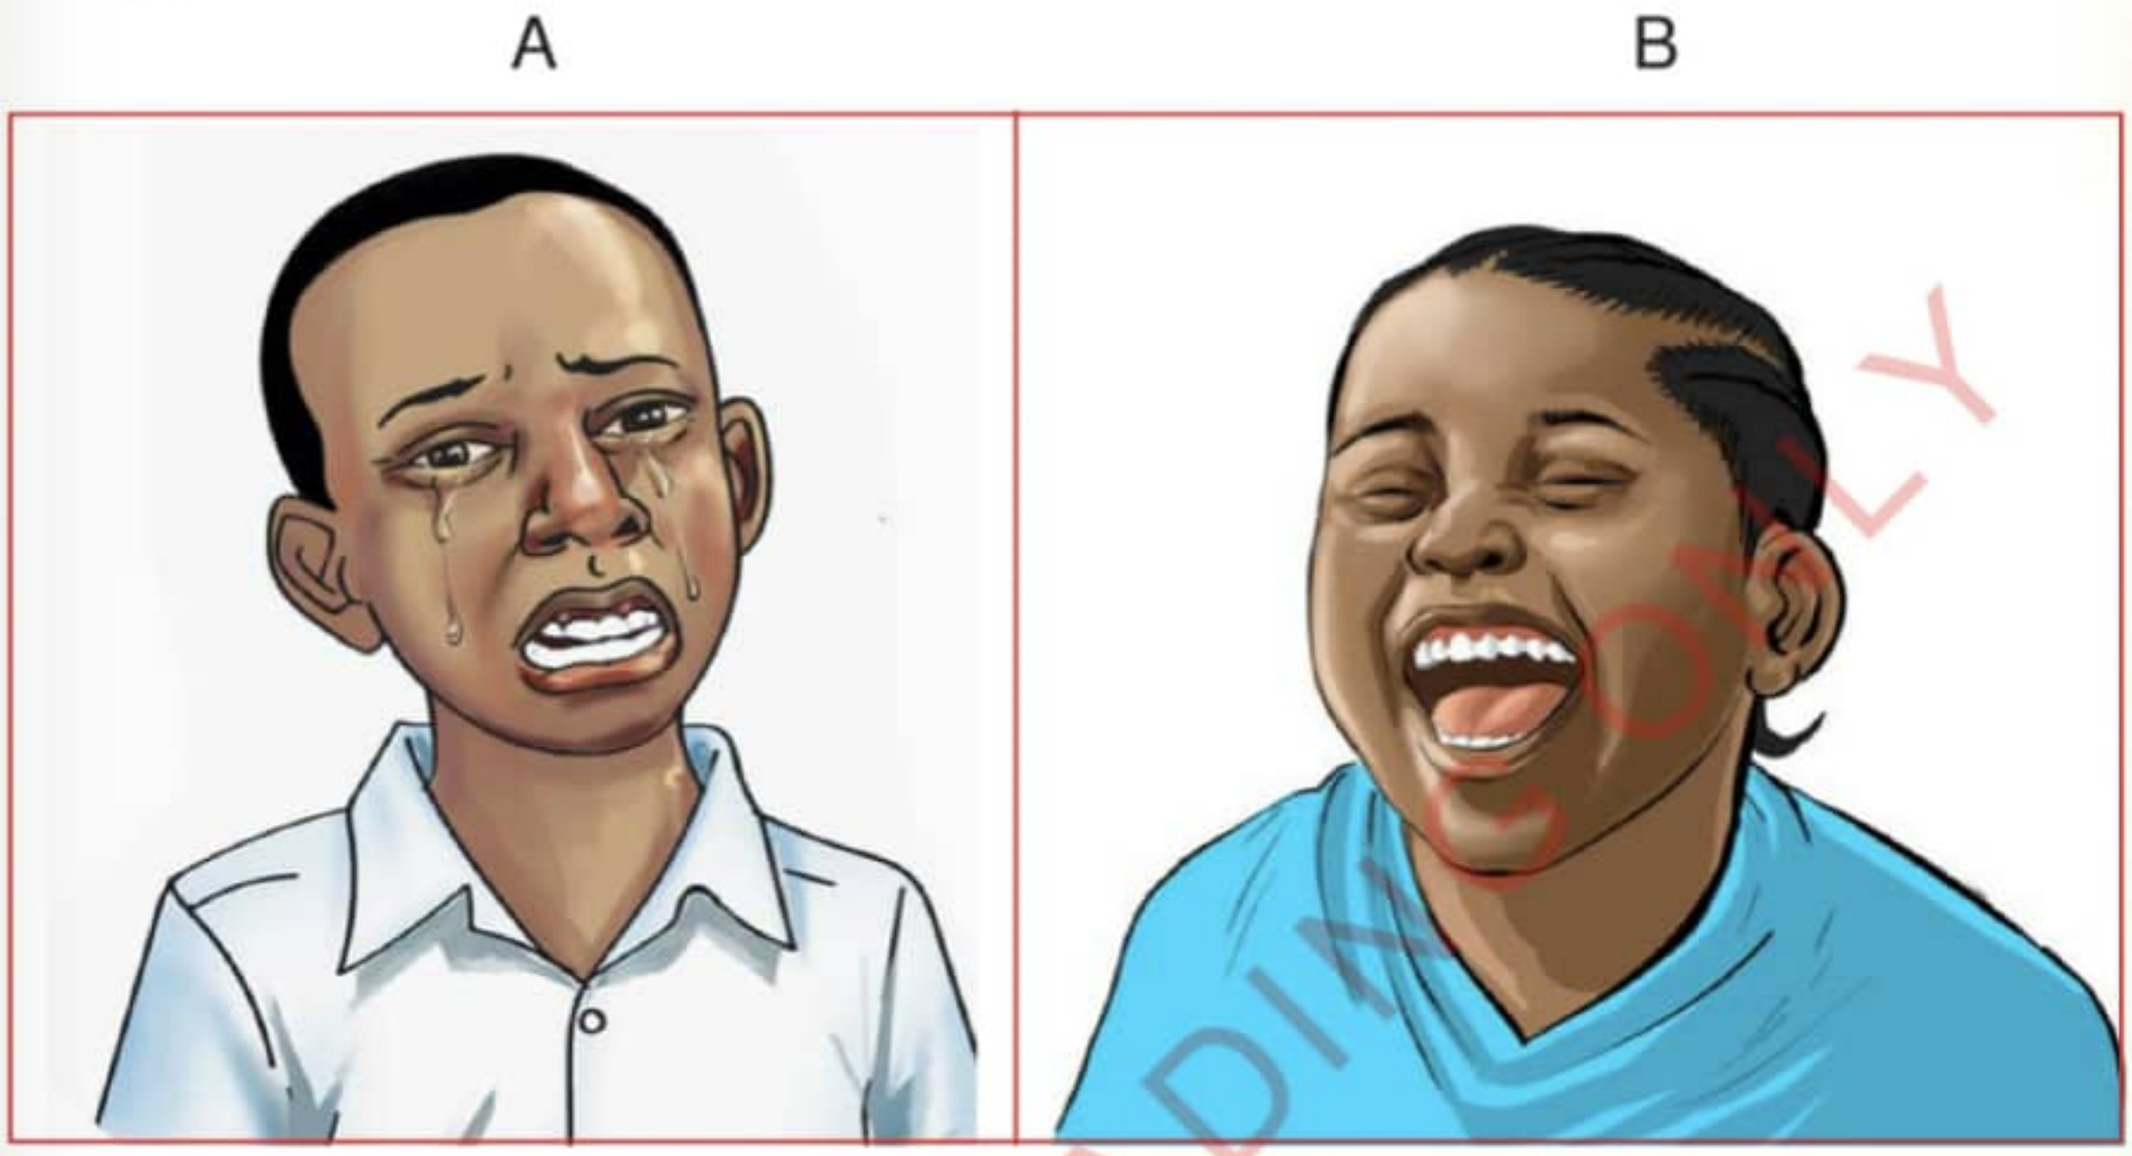

Figure.1: *A an actor practising how to cry and B an actor practising how to laugh*

Activity 5

(a) Act out laughing, begin by laughing softly, then gradually raise the volume until it becomes loud.

(b) Act out crying, start by crying silently, then gradually raise the volume until you cry out loud.

Exercise 2

1. What can you do to show that you are sad without saying anything?
2. Explain how you can show anger without raising your voice in acting.

Voice projection practices in acting

Voice is one of the most important tools in acting. Voice projection is the practice of producing and controlling sound to ensure it can be heard clearly by the audience, depending on the context. Using voice effectively is very important for an actor because it helps the audience to understand the performance. Voice practices can be very fun and interesting. Voice practices in acting include breathing practices and speaking at a distance.

Inhaling and exhaling practices

Inhaling and exhaling practices for an actor aim to help him or her control his or her breath properly. This helps him or her produce a powerful voice and enhance his or her acting on stage. There are various practices such as deep and rapid breathing.

Activity 6

Practise breathing exercise following these steps:

(a) Stand up straight with your legs slightly apart;

(b) Place your hands on your stomach;

(c) Inhale through the nose while feeling the belly expand; and

(d) Then, exhale slowly through the mouth, feeling the stomach drop.

Repeat the steps five times.

Speaking at a distance practices

Speaking at a distance practice is very important in acting because it helps the actor use his or her voice to convey the message to the audience. These practices help the actor to change his or her voice according to the size of the stage and the distance between him or her and the audience. Figure 2 shows an actor practising speaking at a distance.

READING ONLY

www.wazaelimu.com

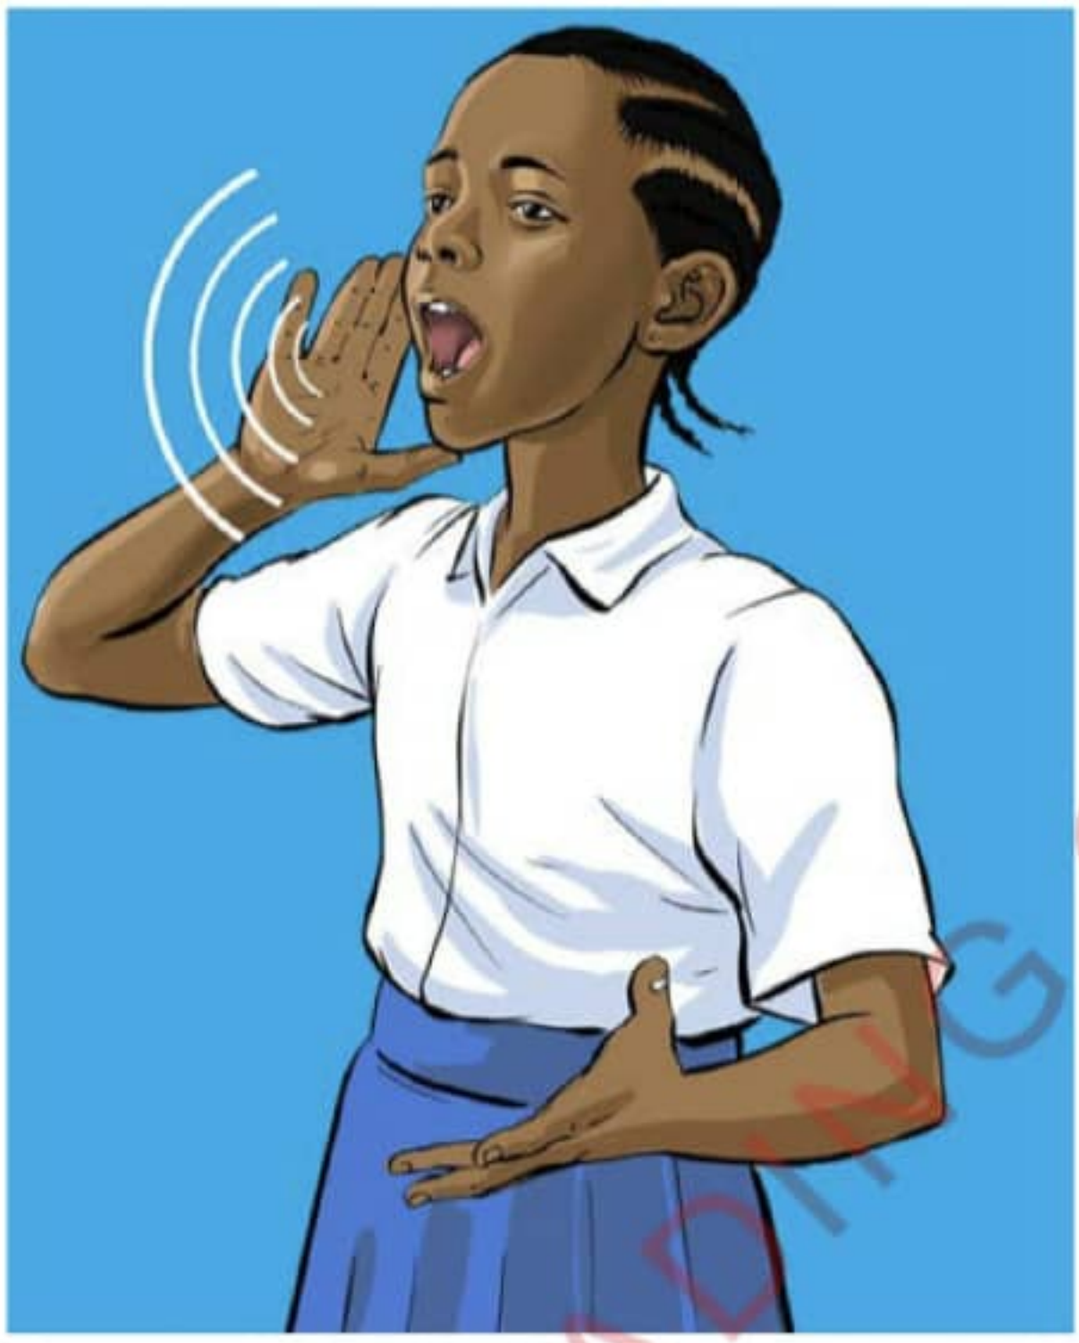

Figure.2: *An actor practising speaking at a distance*

Activity 7

Practice voice projection using the following steps:

(a) Stand at a place where there is a distance between you and the place you aim to convey the message;

(b) Speak in a low voice; then;

(c) Increase the volume slowly aiming to convey the message to the most distant area without making it too loud.

Exercise 3

1. Why is it important to have a strong and clear voice when performing?
2. Explain how to use voice to show emotions if you are playing the role of an angry person in a play.

Chapter Two

Singing and musical instruments

introduction

Singing can involve voice only or a combination of voice and sound of musical instruments. In this chapter, you will learn how to sing in two-part harmony considering correct diction and tone. Likewise, you will learn to sing accompanied by musical instruments. The competencies developed will enable you to sing different songs skilfully.

Think

Singing in two-part harmony

Singing with correct diction

Learning correct diction is necessary for a good singer. A singer should consider the correct diction to convey the intended message. Important issues to consider for correct diction during singing include:

(a) Opening the mouth properly while singing. Proper mouth opening helps in the correct diction of vowels and consonants. Therefore, a singer should pronounce words correctly to ensure the audience understands them;

(b) Breathing correctly while singing. A singer should inhale slowly and deeply, then exhale in a controlled manner to manage airflow. This helps to avoid a shortage of breath while singing;

FOR ONLINE READING ONLY
www.wazeelimu.com

(c) Maintaining tempo of the song. A singer should sing at the correct speed to ensure that words are pronounced at the right time, neither too fast nor too slow; and

(d) Understanding the meaning of words. When a singer knows the meaning of the words, he or she can pronounce them with appropriate emotions, according to the context. This makes the performance more attractive for the audience.

Activity 1

Sing the following patriotic song while considering the correct diction.

Tazama Ramani

(a) Tazama ramani utaona nchi nzuri,
Yenye mito na mabonde mengi ya nafaka,
Nasema kwa kinywa halafu kwa kufikiri,
Nchi hiyo mashuhuri huitwa Tanzania,
Majira yetu haya yangekuwaje sasa?
Utumwa wa nchi Nyerere aliukomesha!

(b) Chemchem ya furaha ama nipe tumaini,
Kila mara kwako niwe nikiburudika,
Nakupenda hasa hata nikakufasili,
Nitalalamika kukuacha Tanzania,
Majira yetu haya yangekuwaje sasa?
Utumwa wa nchi Karume aliukomesha!

(c) Nchi yenye azimio lenye tumaini,
Ndiwe peke yako mwanga wa watanzania,
Ninakuthamini hadharani na moyoni,
Unilinde nami nikulinde mpaka kufa,
Majira yetu haya yangekuwaje sasa?
Utumwa wa nchi Nyerere aliukomesha!

www.wazaelimu.com

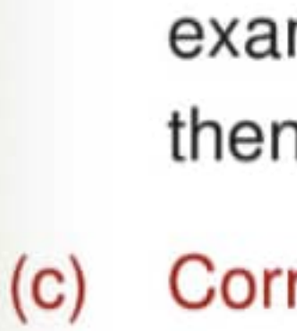

Singing by considering tone

Tone is a sound with a specific pitch and quality that comes from a musical note or a person's voice. In singing, it is important to consider the correct tone for each word and sentence. For a song to have the desired quality, each word should be sung with a meaningful tone that conveys the emotions of the song. Proper use of tone enhances the beauty and quality of the voice. Therefore, a singer should practise singing while considering the tone, ensuring he or she delivers the song skillfully and emotionally. There are various aspects that a singer should consider to produce a high-quality voice. These aspects include:

(a) Correct posture when singing. A singer should make sure he or she keeps the body balanced, with the neck upright, shoulders and arms relaxed, chest and stomach not tense, and feet slightly apart;

(b) Proper breathing while singing. To breathe correctly when singing, a singer needs to practise breathing exercises. For example, taking a deep breath, holding it for a moment, and then slowly releasing it; and

(c) Correct diction while singing. Proper pronunciation is important for achieving the correct tone when singing. Also, it helps a singer to produce a clear and pure sound. In addition, it improves the quality of the voice. This creates a tone that appeals to listeners and ensures the message of the song is understood easily.

Activity 2

Sing your school song while considering the correct tone

FOR ONLINE READING ONLY
www.wazaelimu.com

Singing in two-part harmony

Singing in two-part harmony involves two singers or two groups singing different sounds at the same time. These two voices are sung together while maintaining harmony. Singing in two-part harmony requires great attention and enough skill. Two singers singing in two-part harmony must work together equally. At this stage, you will learn the second voice (alto) to master singing in two-part harmony.

The second voice contributes to bringing a harmonious balance when singing. The second voice is lower than the first voice. When singing in two-part harmony, the singer must consider correct diction and tone to make the song attractive to the audience.

Activity 3

(a) Visit any event in your community that involves singing, or search for recorded events online and identify singing in two-part harmony;

(b) Choose any song and sing it in the first voice (soprano); then;

(c) Sing the same song in the second voice (alto)

Importance of singing in two-part harmony

Singing in two-part harmony is an important aspect of singing that helps improve singing skills. The following are the benefits of singing in two-part harmony:

(a) Making a song so interesting. When two voices are combined, they create a more attractive and pleasing sound. This combination helps convey different emotions like joy or peace;

FOR READING ONLY
www.wazaelimu.com

(b) Developing listening skills. To sing in two-part harmony correctly, singers must listen carefully to each other's voices. Listening carefully helps pupils develop the ability to focus on different sounds while maintaining their voice. This is crucial for learning to sing and improving listening skills;

(c) Strengthening teamwork. When singers sing in two-part harmony, they understand the importance of working together. Since each voice is important to create harmony, singers learn how to work together effectively, where everyone contributes equally to the group. This helps build teamwork and teaches patience and understanding among peers; and

(d) Building confidence. Singing successfully in two-part harmony increases singers' confidence. When singers know they can sing correctly and in harmony with others, they gain the courage to perform in front of an audience. This is an important step in building confidence and the ability to express themselves through singing.

Singing with an accompaniment of musical instruments

Musical instruments are used to support singing. This art needs special skills. There are important issues to consider when singing with musical instrument accompaniment. Singers and musical instruments players should:

(a) Practising together regularly;

(b) Positioning yourself in the correct order. For more than two singers, the standing plan can be a semicircle. The first voice singers, stands in front, followed by the second voice singers. Musical instrument players, should position themselves beside

FOR ONLINE READING ONLY
www.wazeelimu.com

or behind singers depending on the type and number of instruments they play;

(c) Recognising the relevant musical elements. This is important for the singer to deliver the intended performance; and

(d) Ensure the balance between the voices and sounds of the musical instruments.

Arrangement of singers and musical instrument players

Singers and musical instrument players have different ways of arranging themselves on stage. They can arrange themselves based on the number of voices singing and the type and number of musical instruments being used. The goal is to achieve good quality and balance between the singer's voices and the music from the instruments. To have a good arrangement, the following things can be considered:

(a) The soprano singers must be together;

(b) The alto singers must be together;

(c) Musical instruments players of the same type should be together; and

(d) Low-pitched musical instrument players should not stay next to high-pitched ones, as shown in Figure 1. This is because if you mix low-pitched and high-pitched instruments, the low-pitched ones will not be well heard.

Chapter Three

Drawing

Introduction

Fine art uses drawings as a complete language that people can see and understand even if they do not know how to read and write. In this chapter, you will learn to draw images of various objects using a pencil. The competencies developed will enable you to draw images of various objects skilfully.

Think

How to draw images of objects using a pencil

Drawing images of various objects using pencils

Drawing images using a pencil is an art that involves drawing images or sketches with pencils. The tools used include HB, 2B and 4B pencils, drawing paper, and an eraser.

Steps to consider when drawing images of various objects using pencils:

1. Prepare the drawing materials. You will need various drwawing materials such as drawing paper, an eraser, a sharpener and different types of pencils such as HB, 2B and 4B;

2. Start by drawing simple shapes like circles, squares and lines that form the basis of other drawings;

READING ONLY
FOR ONLINE
www.wazeelimu.com

3. Draw light lines of the object you want to draw. This will help you erase and correct easily;

4. Bold your drawing with pencils to make it clear; and

5. Review your drawing to improve the lines by erasing unnecessary marks to enhance the overall appearance.

Using lines to draw stick figures

Stick figures are images of people or things drawn by using only lines. The lines include horizontal, vertical, and curved lines This is the first stage for art beginners. Figure 1 shows the stick figure drawings drawn by a pencil.

Figure 1: *Stick figure drawings*

Drawing tools

The following are some of the tools used in drawing stick figures:

(a) Pencil;

(b) Sharpener;

(c) Drawing paper;

(d) Eraser;

FOR ONLINE READING ONLY
www.wazaelimu.com

(e) Table and chair;

(f) Drawing board; and

(g) Paper clip.

Guidelines for drawing a stick figure

It is important to follow the following tips to draw stick figures:

1. The stick figure should be drawn considering the relevant message;
2. Think of an idea of the object you want to draw or prepare something real that will be drawn;
3. Consider the various uses of lines to get the reality of the idea;
4. Start drawing by making faint lines;
5. Use an eraser carefully to keep your drawing clean; and
6. Do not use an ink pen to draw a picture in this step.

Steps to be followed in drawing stick figure

In drawing a stick figure, there are steps that you need to consider so that your drawing is seen as meaningful. Those steps are:

(a) Select or imagine objects you want to draw;

(b) Prepare a piece of paper and a soft pencil;

(c) Start drawing a stick figure by making faint lines;

(d) Correct drawing mistakes by using a clean eraser;

(e) Bold the lines after you have got the correct shapes; and

FOR ONLINE READING ONLY
www.wazeelimu.com

(f) Remove unwanted lines as well as the dirt caused by the eraser.

Steps of drawing a human stick figure

(i) Think of the direction of the human form. Choose whether the figure will face to the right or left;

(ii) Draw a circle for the head. Start with a small circle at the top of your paper. This will be the head of your human stick figure;

(iii) Draw the neck and shoulders. Draw a cross line connecting with the head;

(iv) Draw the torso (chest, stomach and waist). Draw a straight vertical line down from the head. This line will be the main body of your human stick figure;

(v) Draw the arms. Draw two straight lines extending from the upper part of the body line. These lines represent the arms. You can add small circles at the ends for palms;

(vi) Draw the legs. Draw two straight lines extending downwards branching from the bottom of the cross. These lines indicate the legs. You can add small circles at the ends for feet; and

(vii) Bold the lines. Bold the lines of your image with a pencil, as shown in Figure 2.

Steps of drawing bed stick figure

(i) Decide the direction of the bed; whether it will face right, left or be shown from an angle;

(ii) Draw diagonal and horizontal lines;

(iii) Draw the front vertical lines; and

(iv) Draw back vertical lines on the bottom side, as shown in Figure 3.

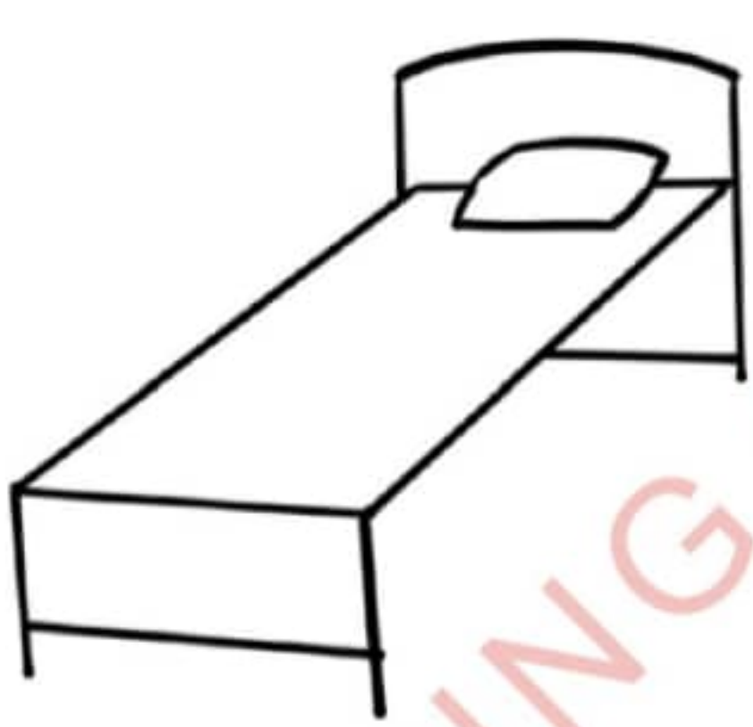

Figure 3: *A bed stick figure*

Activity 2

(a) Use pencil and paper to draw at least five stick figures representing any objects found in the school or home environment;

(b) Display those drawings for class discussion; and

(c) Store those drawings for art exhibition at your school.

Using lines in drawing images of various objects with a pencil

The use of lines is very important in the art of drawing with a pencil.

The following are the basic steps to follow when drawing images of various objects:

FOR READING ONLY
www.waelimu.com

(i) Choose the right pencil. Use different types of pencils like HB, 2B, and 4B. HB pencils are good for light lines, while 2B and 4B are better for dark lines;

(ii) Begin by drawing the guide lines. Draw guide lines to get the correct proportions of your drawing. These lines should be light so that they can be easily erased later;

(iii) Basic lines. Use basic lines to create the shape of the object you are drawing. For example, if you are drawing a face, start with a circle for the head and horizontal and vertical lines for the eyes, nose and mouth;

(iv) Add details. Gradually add more details using lines. This can include lines for hair, clothing or other shapes;

(v) Add shading. Use shading lines to give depth and realism to your drawing. You can use a cotton swab to blend the lines and create smooth shading; and

(vi) Adjust and finish. Carefully review your drawing and make any necessary adjustments. This will include erasing all unwanted marks.

Activity 3

(a) Sketch a desk, table, and chair without lifting your pencil from the paper. Focus on the edges and shapes of the subject; and

(b) Display those drawings in your class for discussion.

FOR ONLINE READING ONLY
www.wazeelimu.com

Activity 4

(a) Use a pencil and paper to draw simple shapes like circles, squares and triangles; and

(b) Display those drawings in your class for discussion.

Activity 5

Use a pencil and paper to draw the following pictures:

(b) A person

(c) A cow

(c) A chicken

Activity 6

(a) Use a pencil and paper to draw pictures of an orange, a table, a house, a flower, and a tree;

(b) Display those pictures in class for discussion; and

(c) Store those drawings for art exhibition at your school.

(ii) Water;

(iii) A piece of timber;

(iv) A piece of paper; and

(v) Rolling object.

Steps for modelling by the slab method

(i) Choose the object you wish to model;

(ii) Place the clay on a board and then roll it using a rolling pin or similar object like a bottle;

(iii) Roll the clay to get a slab, as shown in Figure 2;

Figure 2: *Rolling the clay to form a slab*

(iv) Cut the slab into pieces of the required size and shape, as shown in Figure 3;

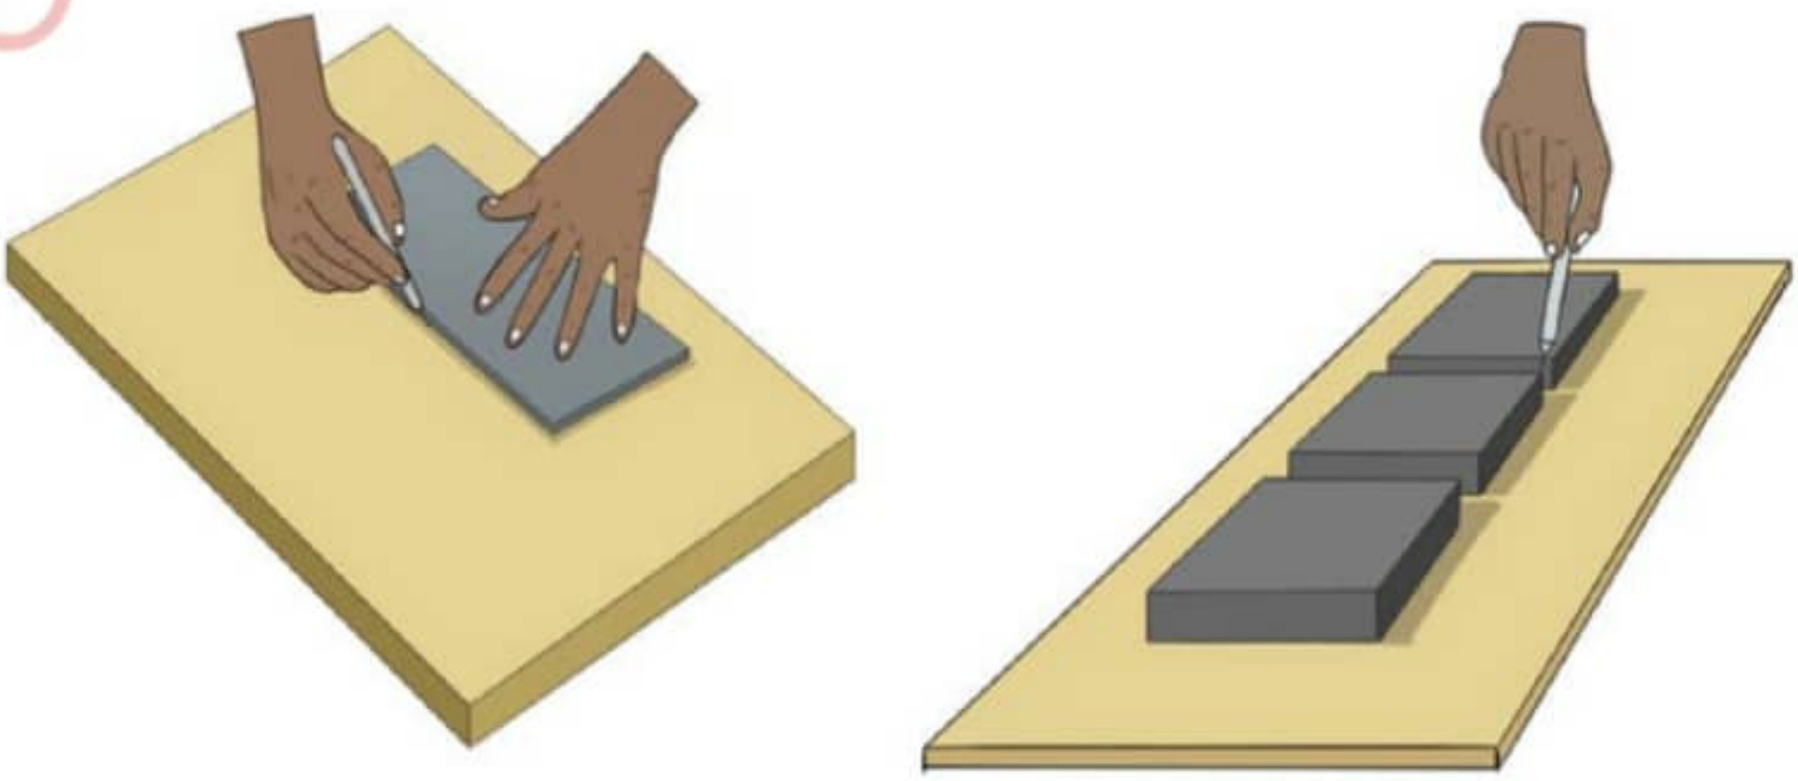

Figure 3: *Cutting the clay into pieces*

www.wazaelimu.com

Modelling using the coiling method

This method is suitable for modelling objects with long shapes such as jars, water pots and tall flower pots, as shown in Figure 6.

Figure 6: *Objects modelled by the coiling method*

Steps to be followed in modelling by the coiling method

(a) Choose the object you want to model;

(b) Roll the clay until you get a slab to cut the base, as shown in Figure 7;

(c) Cut the slab to get the model base of your choice;

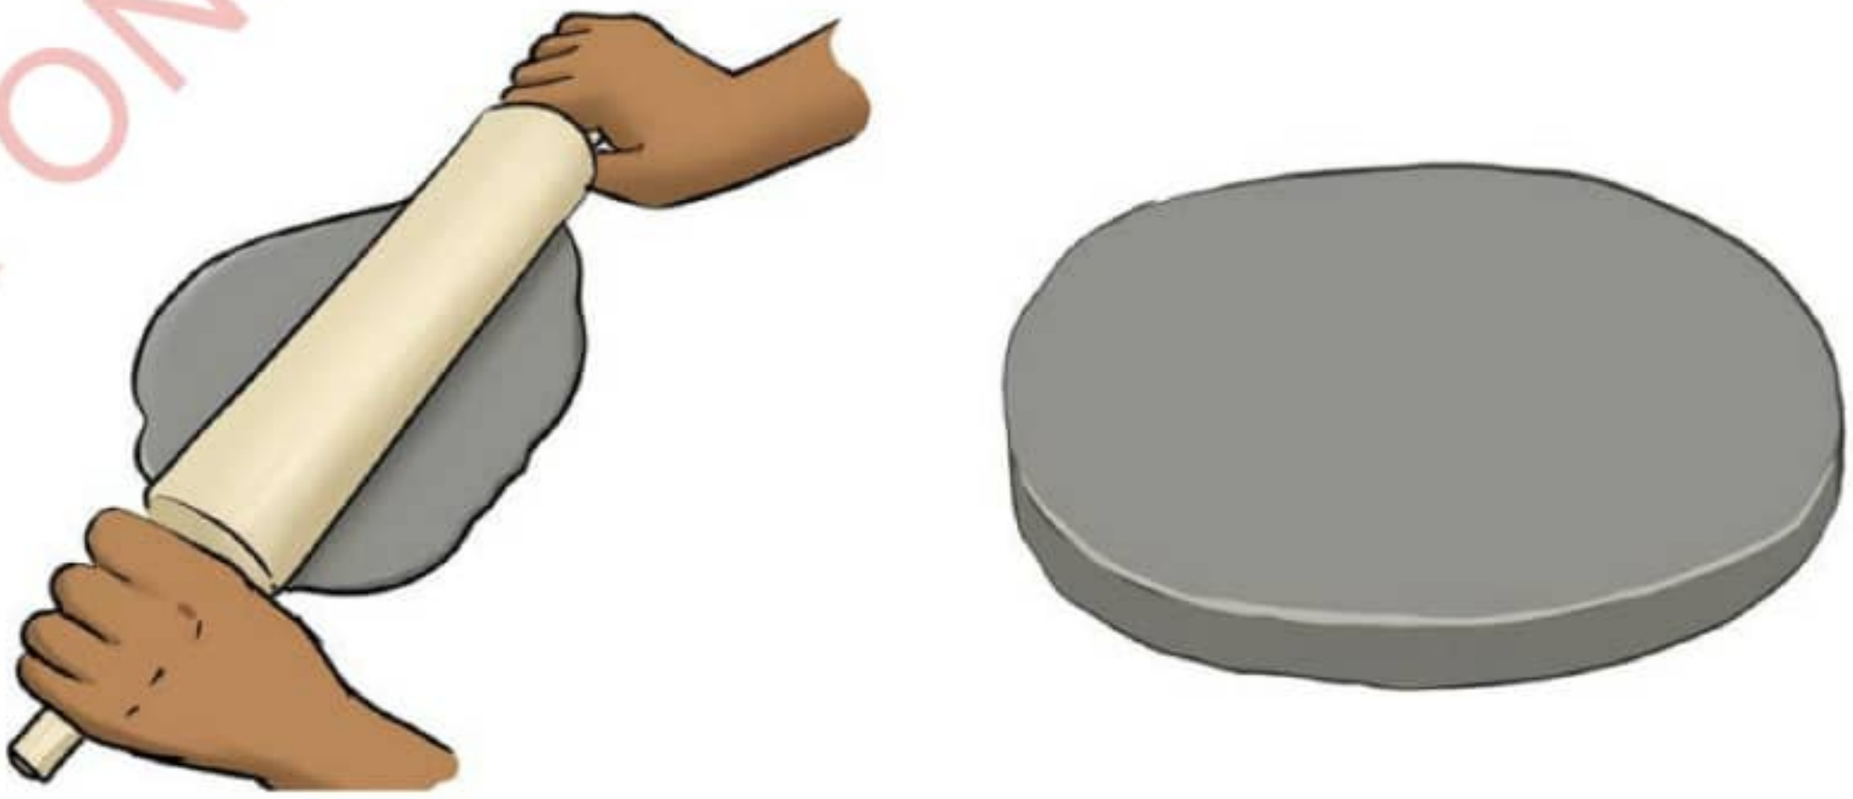

Figure 7: *Rolling the slab and cutting the base*

FOR ONLINE READING ONLY
www.wazeelimu.com

(d) Roll the coil to get the width of the object you want to model, as shown in Figure 8;

(e) Join the coil to the base and place another coil on top of the first one;

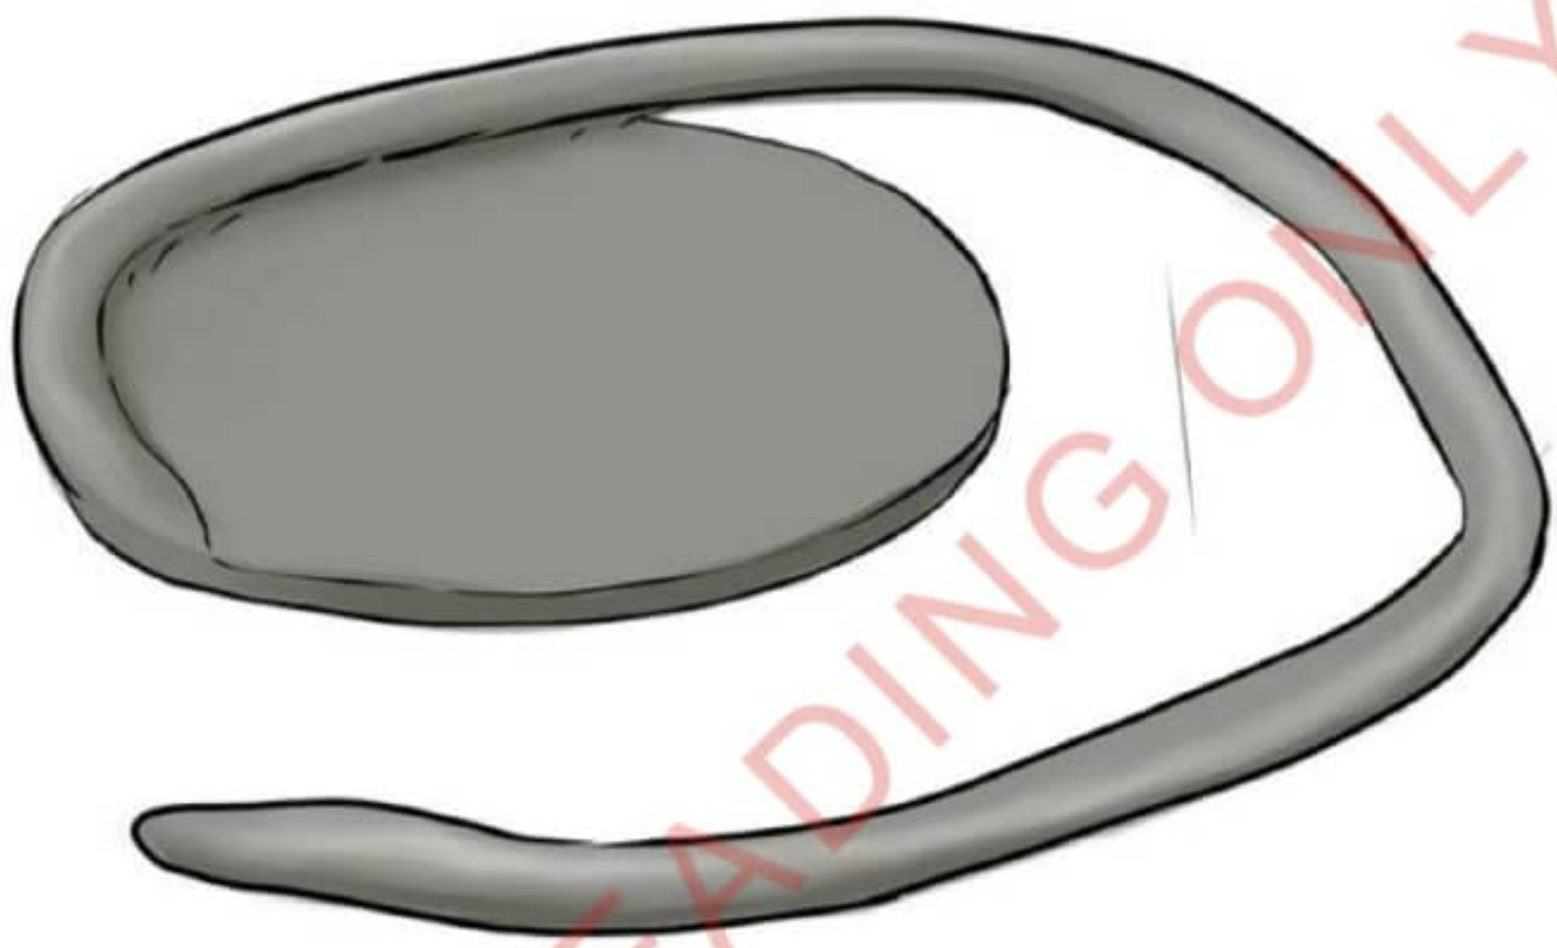

Figure 8: *Joining the base and the coil*

(f) Use the thumb to press the coil from the top to the base, as shown in Figure 9;

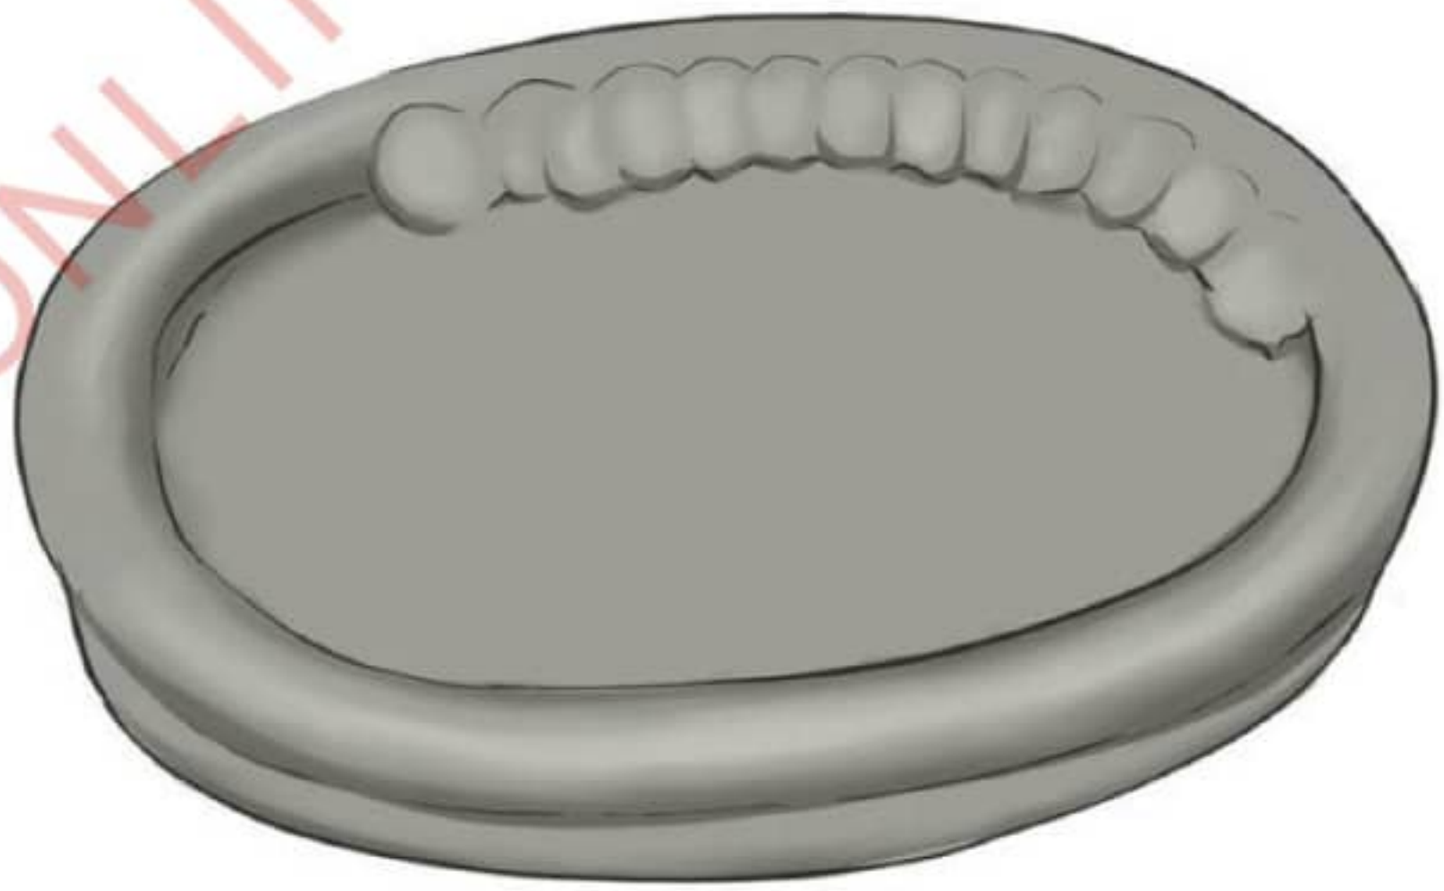

Figure 9: *Strengthening the base and the coil*

(g) Make another round above the circle that accompanied the base;

www.wazeelimu.com

(h) Use the thumb to press the coil from the top to the bottom, as shown in Figure 10;

Figure 10: *Joining coils by pinching*

(i) When one coil is complete, join it with another coil. Continue constructing the wall of the object until the required height is reached, as shown in Figure 11;

Figure 11: *Joining coils to get the required shape of an object*

(j) Smoothen the edge of the object once it is completed, as shown in Figure 12;

FOR ONLINE READING ONLY
www.wazeelimu.com

Figure 12: *Levelling the lip of an object*

(k) Estimate the average height suitable for the object to prevent collapsing due to the wetness of the clay soil and the weight of the upper part. To avoid this situation, leave the object open for a short time so that it gets a bit dry, and then continue to complete it, as shown in Figure 13;

Figure 13: *The object is open to drain water*

(l) If you are resting for a bit, cover the object with a nylon sheet so that it doesn't get completely dry before it is completed;

(m) When smoothing the wall, do not use too much water. The water will weaken the object;

(n) Smoothen the inner and outer walls by using a smooth tool such as a piece of glass or a plastic sheet. Also, you can smoothen just the inner part and leave the outer part as it is; and

FOR ONLINE READING ONLY
www.wazaelimu.com

(o) Decorate the object before it gets completely dry, then put the object in the shade so that it dries slowly, as shown in Figure 14.

Figure 14: *Decorated object*

Activity 2

(a) Model at least one object by using the coil method;

(b) Display in the class for discussion; and

(c) Store the objects you modelled for the art exhibitions at school.

Modelling by slab and coiling method

Modelling by slab and coiling method is a technique used to create a model by combining two methods which are slab and coiling. This involves creating shapes that mix flat and curved parts.

Steps for modelling by the slab and coiling method:

(a) Choose the shape you want to model. It can be, a bowl or flower vase;

FOR ONLINE READING ONLY
www.wazaelimu.com

(b) Prepare the clay based on the needs of the model you want to shape;

(c) Decide which parts will be flat and which will be coiled; then

(d) Start shaping by making either the flat or coiled parts first, depending on the design of the model you want to create.

Drying the model

The modelled object should be dried by wind or fire depending on the nature of the clay so that it becomes strong. Then, decorate to make it attractive. If the object does not dry properly, it will not be suitable for long-term use.

Steps for drying the model

(a) After modelling the object, let it dry a little in the sun;

(b) Add your favourite decorations, such as flowers and lines; and

(c) Let it dry slowly in the shade.

Exercise

1. Explain how to prepare clay for modelling pots?
2. What is the best method for modelling water jars?

Vocabulary

Cuboid A shape with a six-sided appearance where its length is greater than the wide

Cube A shape with a six-sided appearance where all sided are the same

Chapter Five

Physical exercises

Introduction

Physical exercises are done for various purposes including healthy life style. In this chapter, you will learn to perform physical exercises for body coordination and flexibility. The competencies developed will enable you to strengthen your playing skills and promote your health and physical fitness.

Think

Physical exercises for body coordination and flexibility

Physical exercises for body coordination and flexibility

There are various types of physical exercises for body coordination and flexibility. These exercises can be done individually, in pairs or in groups with different styles. Some of these exercises are circuit cones for body flexibility and balloon balance for body coordination.

Circuit cones

This is a physical exercise that carries different types of flexibility exercises.

Tools

(a) Six cones; and

(b) Mats

FOR ONLINE READING ONLY
www.wazaelimu.com

How to practise

1. Arrange the cones in a circular pattern in an open space at a distance of 3 to 5 steps from one cone to another, as shown in Figure 1;

Figure 1: *Six cones arranged in circular form*

2. Be in pairs or groups, each group starting at a different cone;
3. After the command of the leader, start the rotation by doing one of the chosen flexibility exercise at each cone; and
4. After completing all the cones, return to the starting point.

Some exercises to be done at each cone

1. Stretching the back of the body:

   (a) Stand beside the cone and bend down to touch the toes, as shown in Figure 2; and

   (b) Hold it for 10 to 15 seconds.

Figure 2: *A pupil stretching the back by touching the toes*

FOR ONLINE READING ONLY
www.wazeelimu.com

2. Stretching the front of the thigh:

(a) Stand on one leg and bend the other leg backward;

(b) Hold the ankle of the lifted leg and pull it backward, as shown in Figure 3;

(c) Hold it for 10 to 15 seconds; and

(d) Change the leg and repeat the same steps.

Figure 3: *A pupil stretching the thigh by holding one leg*

3. Stretching the back of the thigh:

(a) Sit down with legs straight and extended,

(b) Bend one leg,

(c) Bend your body towards the stretched leg, as shown in Figure 4,

(d) Hold for 10 to 15 seconds; and

(e) Change the leg and repeat the same steps.

FOR ONLINE READING ONLY
www.wazeelimu.com

Figure 4: *A pupil stretching the back of the thighs*

4. Stretching calf muscles:

   (a) Stand upright and cross your legs;

   (b) Bend forward pressing your back leg heel into the ground, as shown in Figure 5;

   (c) Hold your front leg;

   (d) Hold it for 10 to 15 seconds; and

   (e) Change the leg and repeat the same steps.

Figure 5: *A pupil stretching the calf muscles*

5. Stretching the waist:

   (a) Stand upright and put your hands on your waist;

   (b) Slowly rotate your waist from right to the left and vice versa, as shown in Figure 6; and

   (c) Continue for 10 to 15 seconds.

Activity 1

Practice the flexibility exercises you have learnt

Exercise 1

1. What is the importance of circuit exercise to you?
2. Which games will this exercise help you play?

Balloon balance

It is an exercise that requires the participant to throw a balloon in the air and prevent it from falling by using various parts of the body. Body parts such as the head, shoulders, chest, hands, knees and feet can be used to make the balloon stay in the air. This exercise helps to improve body coordination.

Tools:

1. Balloons; and
2. Cones.

How to practise:

1. Prepare your body by running slowly and stretching the legs, shoulders and waist;
2. In the open area, set the boundaries of the playing area;
3. Fill the balloon with air;
4. Hold balloon and enter the playing area; and
5. Throw balloon in the air and prevent it from falling by using your hands as shown in Figure 8, feet, head, chest and knees.

FOR ONLINE READING ONLY
www.wazeelimu.com

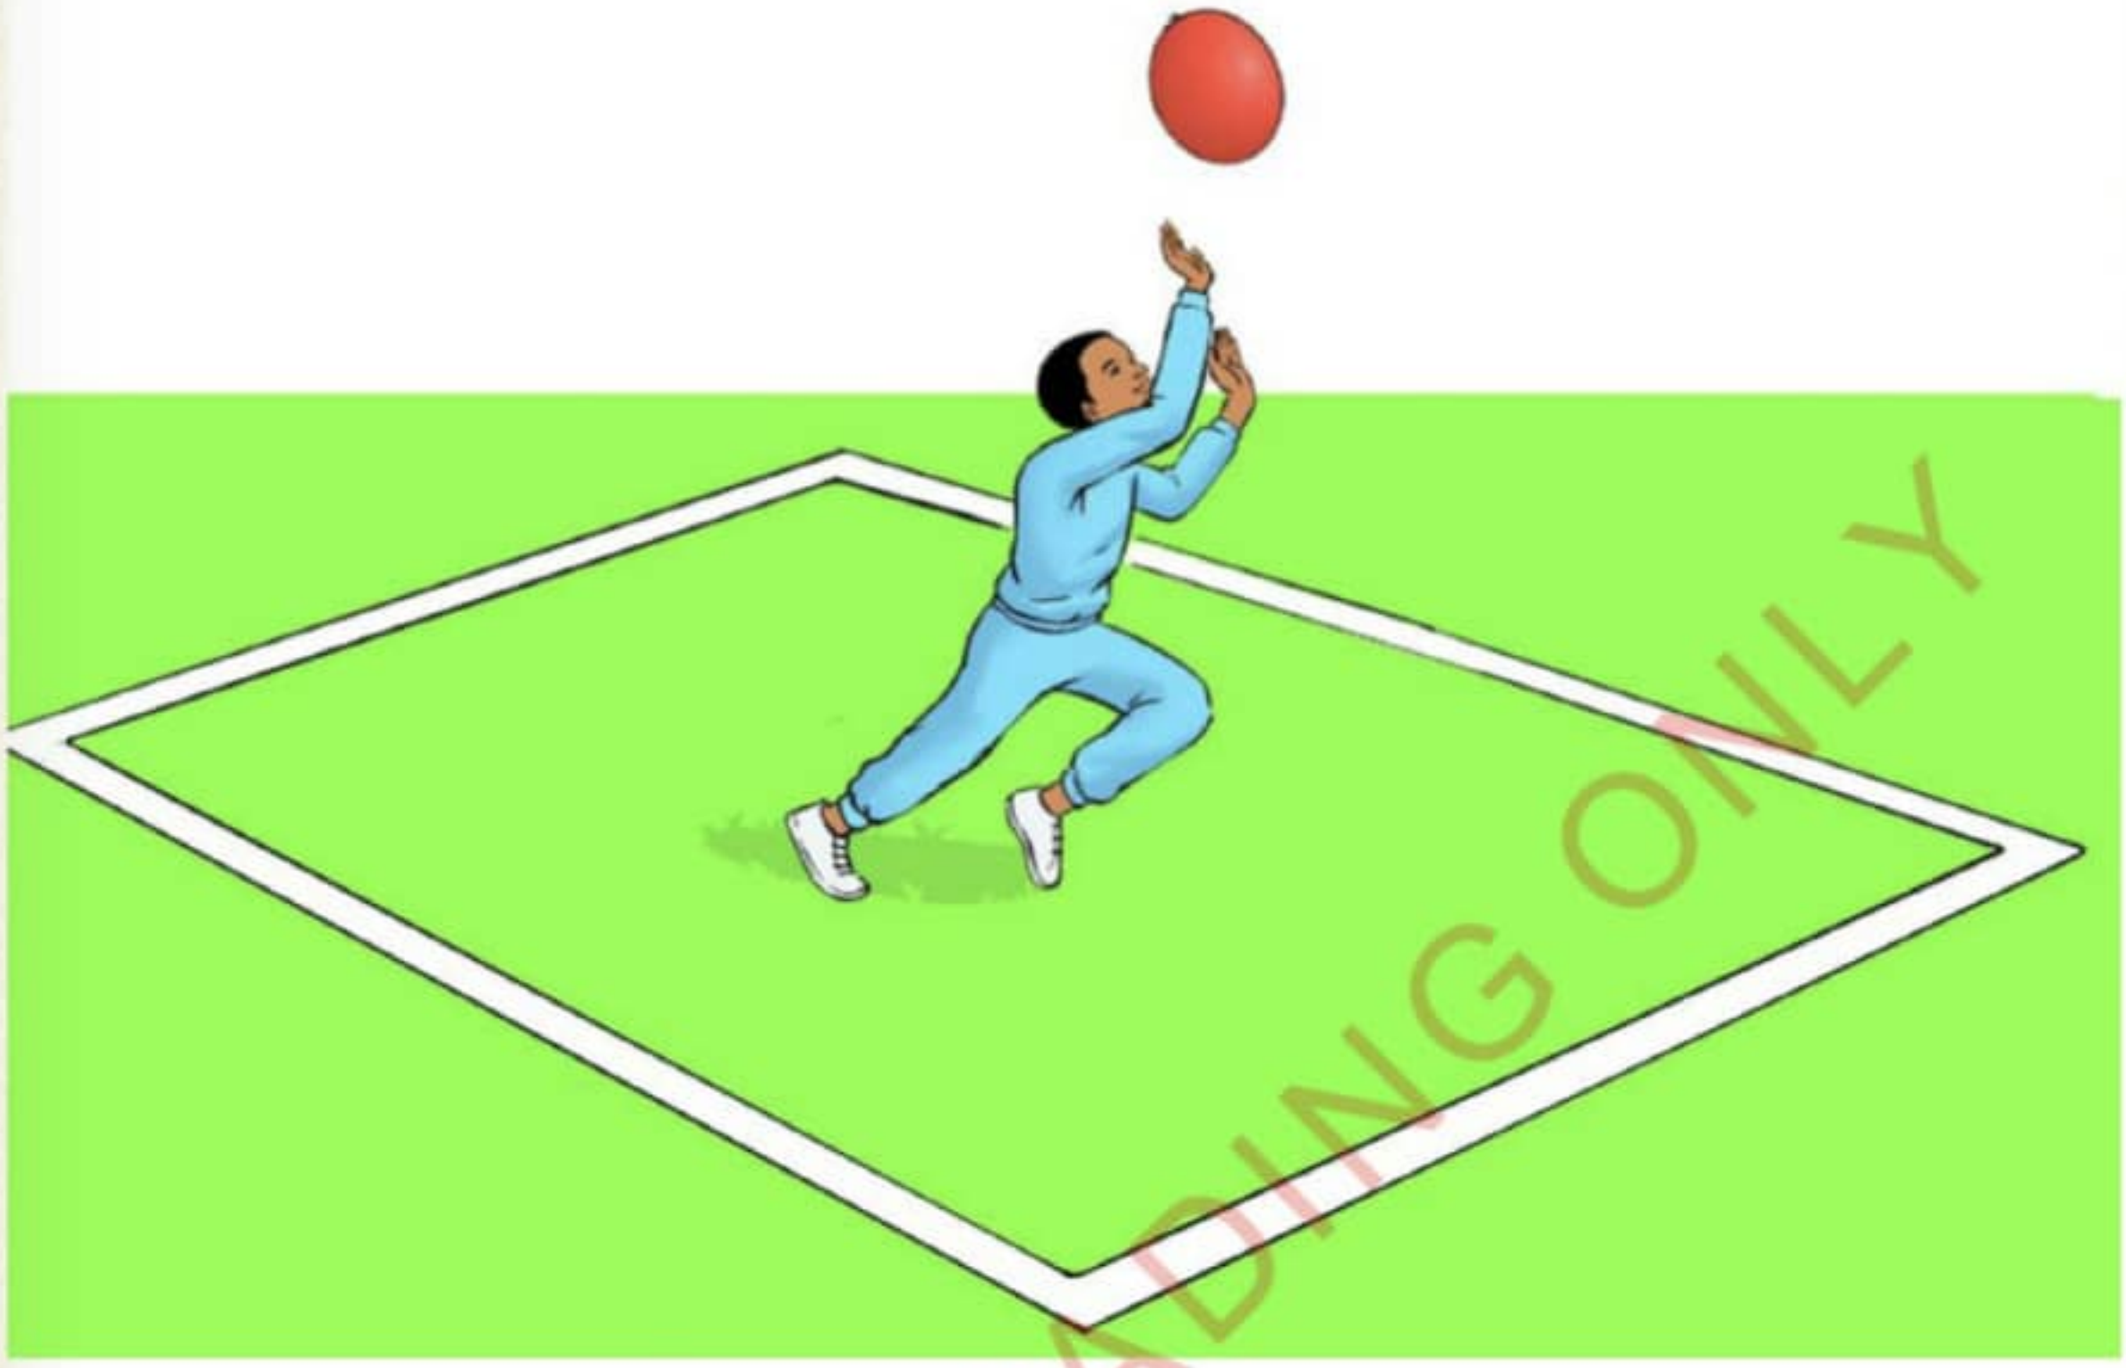

Figure 8: *A pupil preventing the balloon from falling*

6. Continue keep the balloon from falling while moving within the boundaries set in the playing area;
7. After five minutes, add obstacles such as cones inside the playing area;
8. Continue to keep the balloon in the air while avoiding the obstacles, as shown in Figure 9;

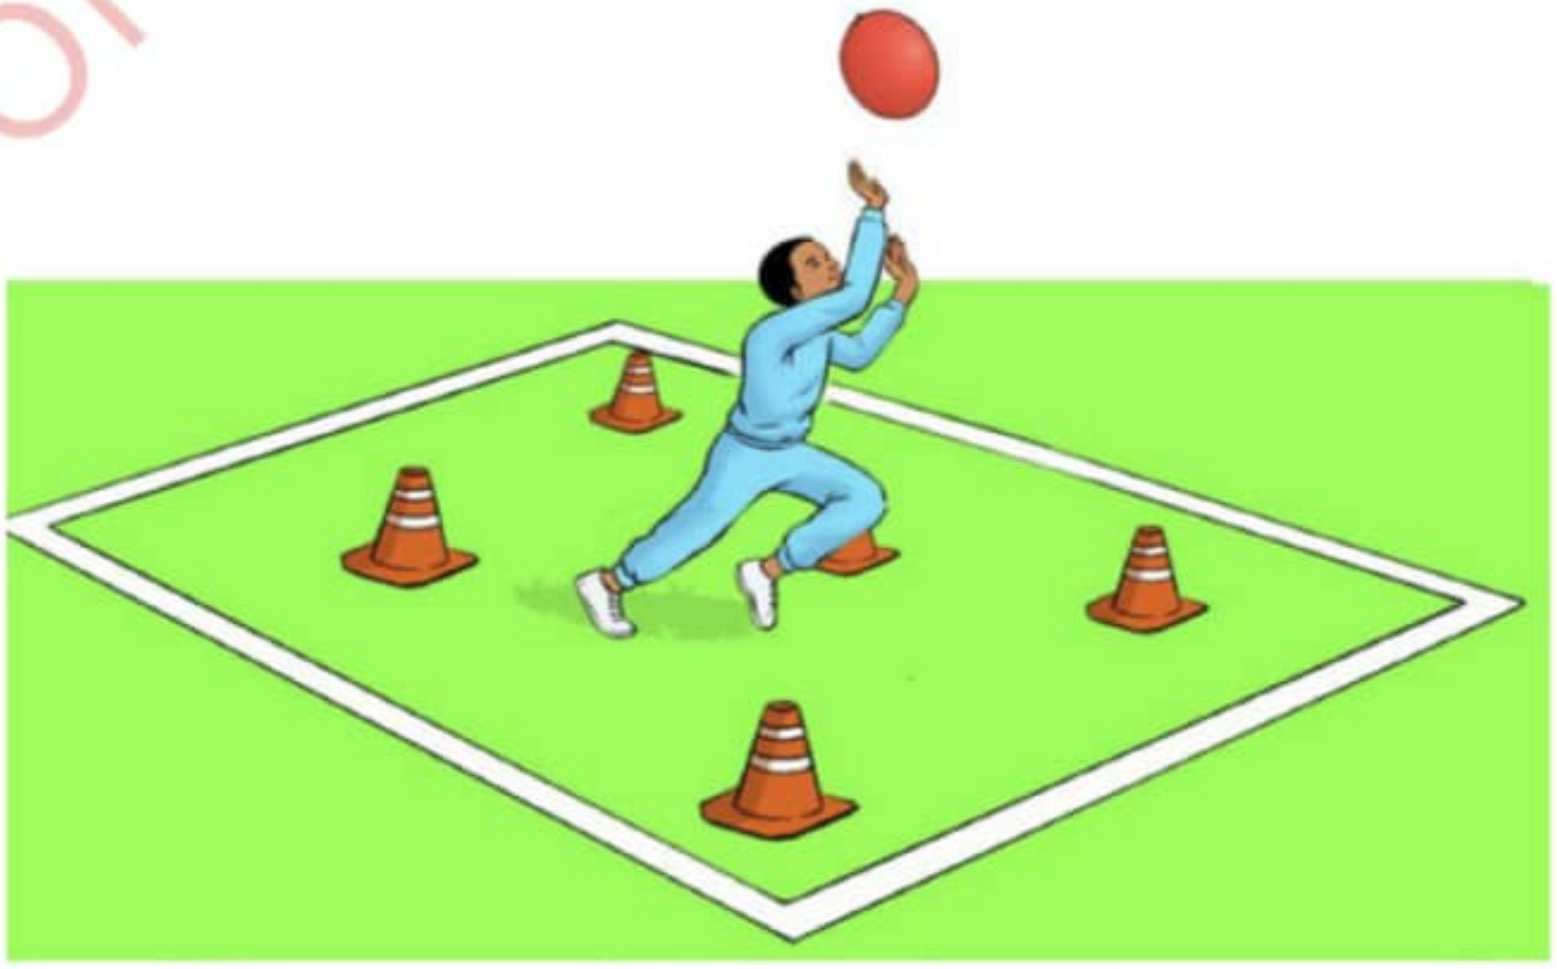

Figure 9: *A pupil preventing a balloon from falling while avoiding obstacles*

FOR ONLINE READING ONLY
www.wazeelimu.com

9. Increase the complexity by using two balloons at the same time while avoiding obstacles, as shown in Figure 10;

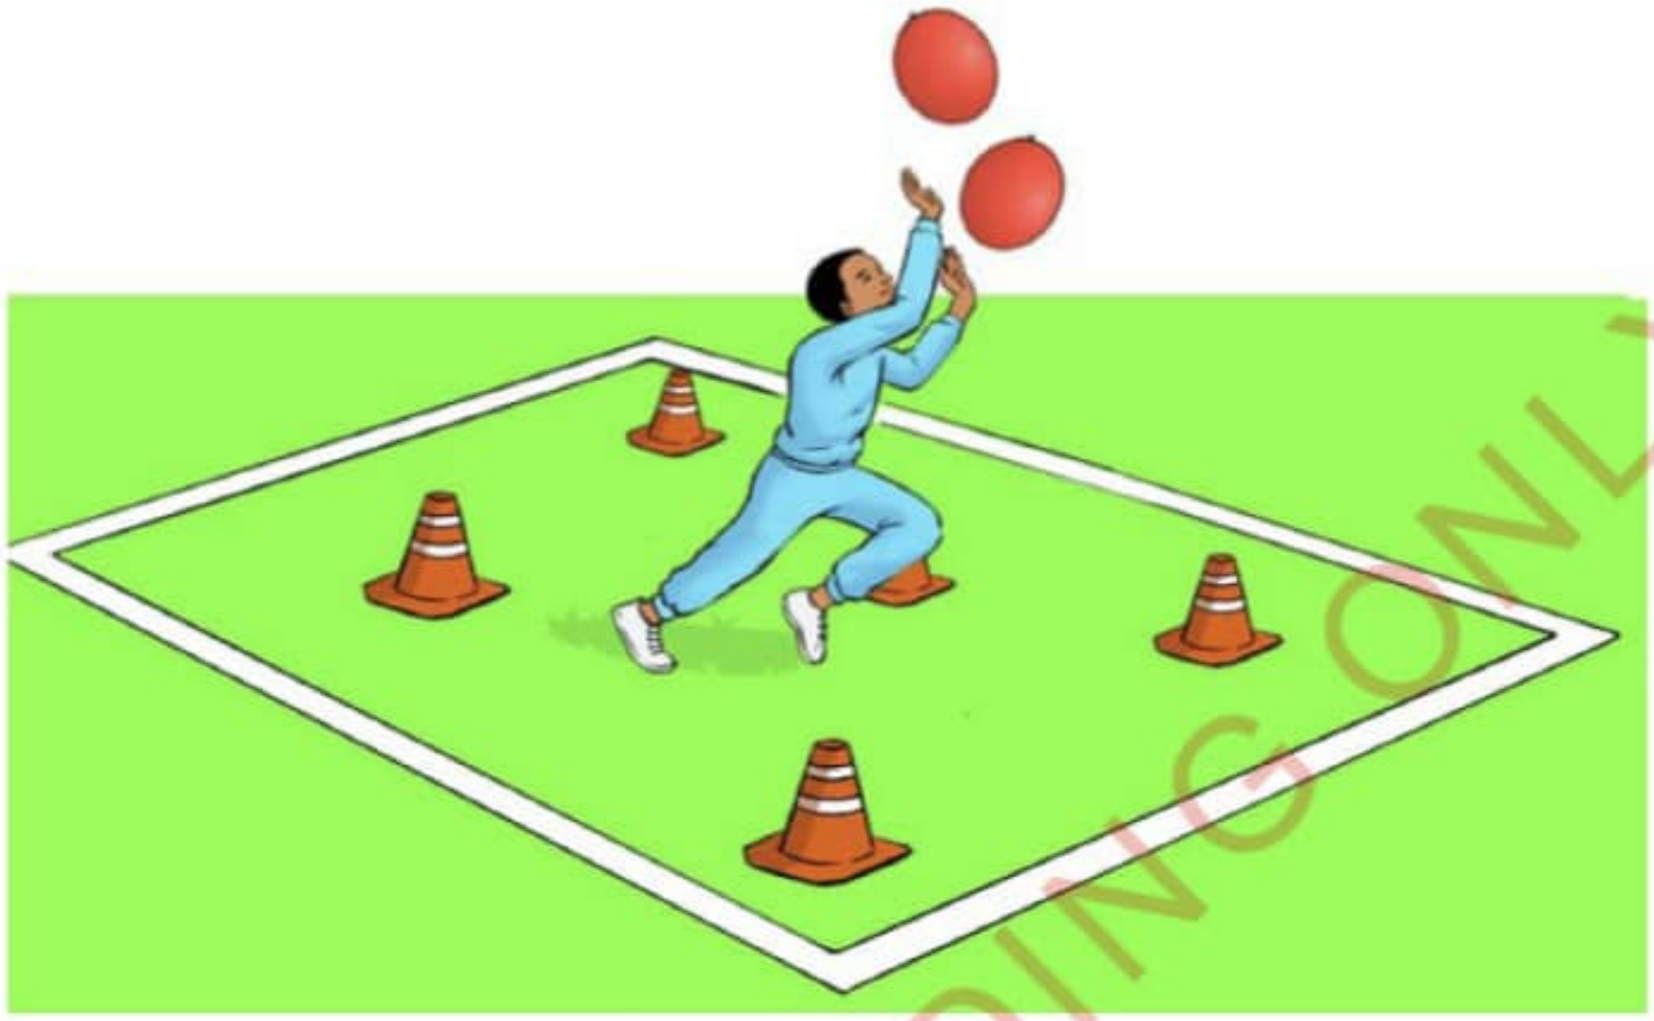

Figure 10: *A pupil preventing two balloons from falling while avoiding obstacles*

For the competition, whoever drops the balloon, allows it to go outside the boundaries or hits the obstacles will be out of the game until the winner is found.

Activity 2

Compete with your colleagues to prevent the balloon from falling while increasing the obstacles and consider how long each of you will be able to withstand the obstacle.

Exercise 2

1. What is the importance of balloon balance exercise to you?
2. Which games will this exercise help you play?
3. Name other equipment you can use as obstacles instead of cones.

Chapter Six

Traditional and modern games

Introduction

There are various traditional and modern games. In this chapter, you will learn to play some traditional and modern games. The competencies developed will enable you to perform traditional and modern games learnt proficiently.

Think

Various traditional and modern games

Traditional games

Traditional games are an important part of the culture and heritage of our communities. They are interesting when you watch them being played. There are many traditional games, but in this section, you will learn to play the sack race and chicken chase games.

Sack race

This is the traditional game in which participants compete to run by jumping forward while standing inside sacks. It is a game that requires the players to discover a technique that will enable them to run fast and easily while standing inside the sack. This game can be played individually or in groups. The game usually takes place during school events and community celebrations.

FOR ONLINE READING ONLY
www.wazeelimu.com

How to play:

1. Exercise to prepare your body by running slowly for 2 to 3 minutes;
2. Mark the starting and ending points of the playing area. The distance can be between 25, 50, 75, or 100 meters depending on the ability of the players;
3. Put off your shoes and hold your racing sack;
4. Stand at the starting point;
5. Stand inside the sack and make sure it goes beyond the waist;
6. Hold the sack with your hands so it doesn't fall;
7. Wait instructions from the leader;
8. After the command from the leader, start jumping forward with two legs together;
9. Run faster than others towards the finish line, as shown in Figure 1; and
10. The winner is the one who will be the first to cross the finishing line.

Figure 1: *Pupils competing in the sack race*

FOR ONLINE READING ONLY
www.wazeelimu.com

Activity 1

Practise the game of the sack race

The importance of the sack race game

This game has the following benefits for players:

(a) It entertains the participants and audiences;
(b) It builds friendship and teamwork;
(c) It improves the ability to think;
(d) Energizes participants' bodies;
(e) It develops the competitive spirit;
(f) It promotes their health; and
(g) It nurtures the running talents.

Exercise 1

1. How did you feel when you played the sack race game?
2. What challenges did you meet while playing this game?
3. What technique did you use to play this game without falling down?

Chicken chase game

This is a traditional game and very popular in some places; often in children's bonanzas or sports concerts. It is a game that can be played by people of all ages. This game aims to have fun, improve health, and build teamwork among the players. It is important to ensure that the chicken that will be used will not be harmed or hurt while playing this game.

FOR ONLINE READING ONLY
www.wazeelimu.com

How to play:

1. Prepare a healthy chicken. It can be a cock or a hen;
2. Stay into two teams. Each should have no more than four players depending on the size of the field;
3. Non-playing pupils should form a circle so that the chicken can run around but does not escape;
4. The leader will start the game by throwing the chicken in the center of the circle, then blowing the whistle to start the game; and
5. After the command of the leader, chase the chicken until you catch it, as shown in Figure 2.

Figure 2: *Pupils competing to chase a chicken*

Things to consider:

The following things should be considered when playing a chicken chase game:

(a) The game can be played by girls and boys. Girls compete with themselves and boys the same;

FOR ONLINE READING ONLY
www.wazeleimu.com

(b) If the chicken goes out of the circle without being caught by any player, the game is repeated;

(c) The time to chase the chicken is between three to five minutes, if the chicken is not caught, players from other teams will enter;

(d) It is not allowed to kick the chicken to catch it;

(e) It is not allowed to step on the chicken to catch it; and

(f) If you are not a player, you are not allowed to catch the chicken even if it passes near you.

Importance of chicken chase game

The following are the benefits of this game to players:

(a) It makes their bodies active;

(b) It builds friendship and teamwork;

(c) It improves the ability to think;

(d) It provides the body with physical exercises;

(e) It develops the competitive spirit; and

(f) It nurtures the running talents.

Activity 2

With your fellows play a chicken chase game

FOR ONLINE READING ONLY

Exercise 2

1. How did you feel when you played the chicken chase game?
2. Which way did you use to get very close to the chicken?
3. Among speed, cleverness, and skill, which is most needed in the chicken chase game? Give a reason for your answer.
4. Why it is important to choose healthy chicken for this game?

Modern games

Modern games are games which originated from other communities outside Tanzania. These games began to be played in other areas such as Asia and Europe. Modern games are much famous in the world. There are many modern games, some of them include acrobatics, football and netball.

Acrobatics game

Acrobatics is a type of game or activity that involves displaying physical skills, bravery, and various exercises that are performed in front of an audience. In acrobatics, participants can perform various fun or amazing movements such as jumping, balancing, playing with various equipment and creating various shapes on land and in the air. Acrobatics are often performed to entertain the audience. Below are some of the games involved in the acrobatics:

Crab walk

Here the player will have to walk by hands and feet like a crab.

How to play:

1. Prepare your body by running slowly for 2 to 3 minutes and stretching the body;

FOR ONLINE READING ONLY
www.wazaelimu.com

2. Lie on your back with your legs folded and your arms on the ground in front of your head, as shown in Figure 3;

Figure 3: *A pupil lying on his or her back to support his or her body*

3. Push your body upward supported by legs and arms, as shown in Figure 4;
4. Keep your head behind all the time;
5. Keep your feet close to avoid losing balance;

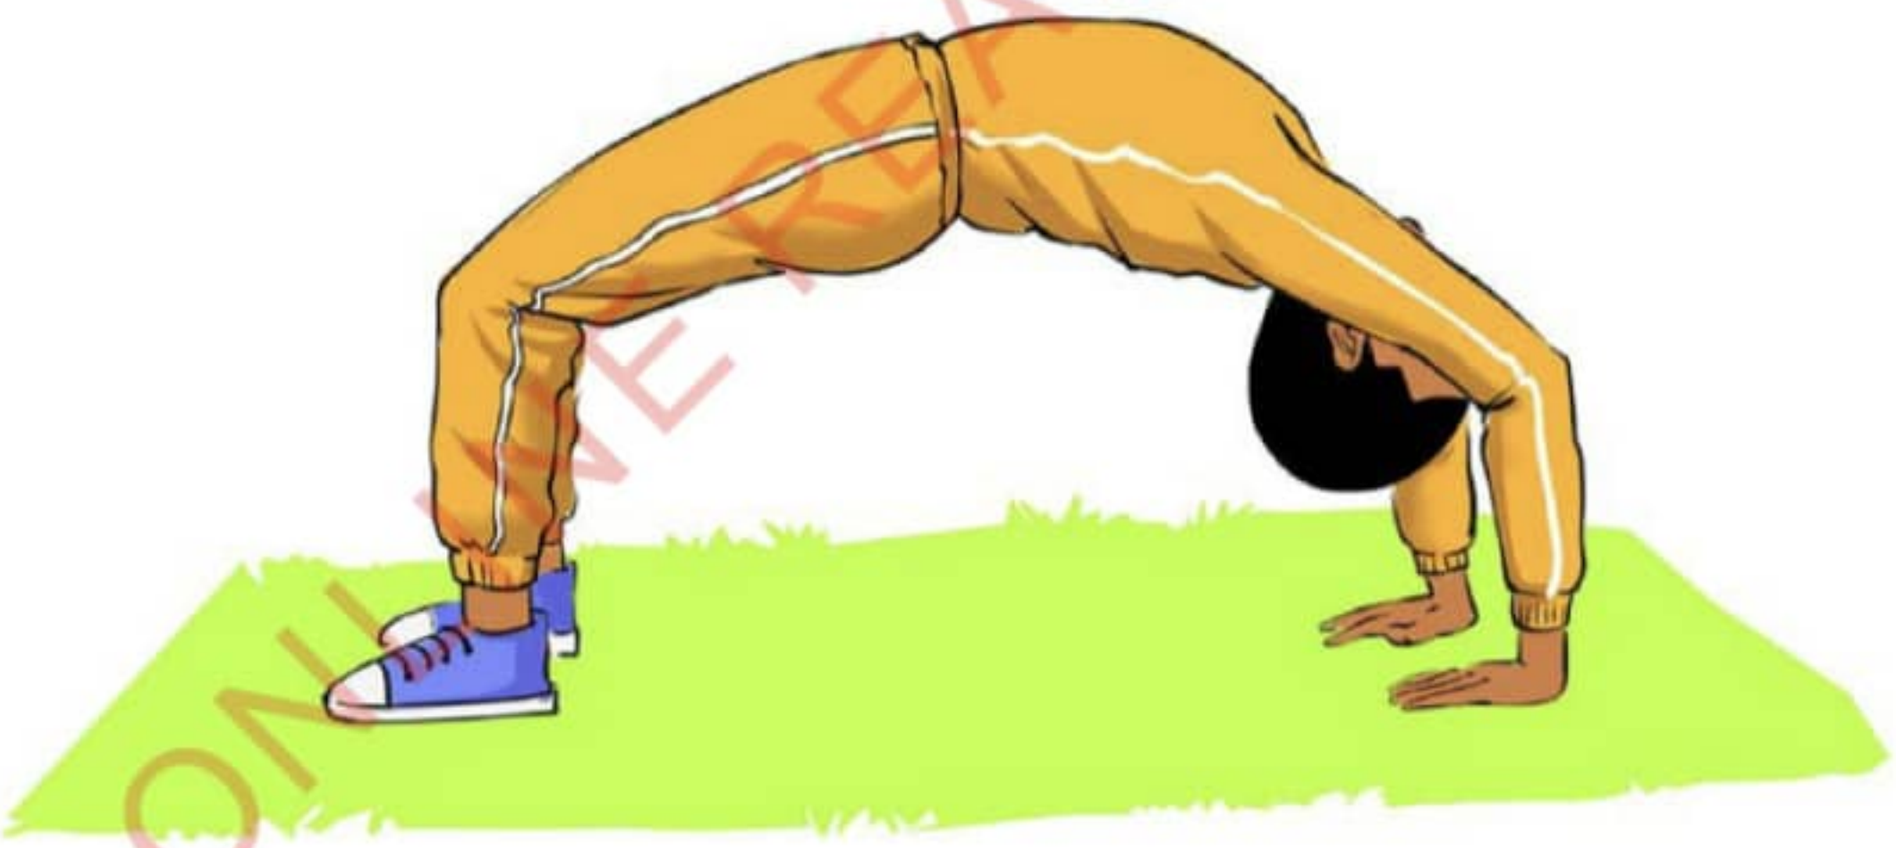

Figure 4: *A pupil lifting himself or herself using his or her feet and hands*

6. Without changing the position, walk forward then go backward; go to the left then right.

Activity 3

Play a crab walking competition with your friend

Chapter Seven

Art exhibitions, performances and sports competitions

Introduction

In the preceding chapters, you have learnt about acting, singing and musical instruments, drawing and clay modelling. You also learnt about physical exercises and traditional and modern games. In this chapter, you will learn how to prepare and participate in art exhibitions, performances and sports competitions at the school level. The competencies developed will enable you to participate in various art exhibitions, performances and sports competitions at school and in the community.

Think

How to perticipate in art exhibitions, performances and sports competitions at the school level.

Art exhibitions, performances and sports competitions

Art exhibitions, performances and sports competitions at school level is the way of discovering and nurturing various talents. In this chapter, you will have the opportunity to participate in performing and showing various artworks you have created as well as participate in sports competitions at the school level. The art exhibitions will include drawing and clay modelling, while the performing arts will

FOR ONLINE READING ONLY
www.wazeelimu.com

include acting and singing. Sports competitions will include physical exercises and traditional and modern games.

Participating in performing arts

To participate in performing arts, consider the following steps:

1. Choose a topic for the performance. It is good to choose a message that reflects the daily life of your community. You can discuss with your teacher to choose the relevant topic. Examples of messages that can be used are effects of corruption, diseases, environment, tax education, children's rights, or the Union of Tanganyika and Zanzibar;

2. Stay in groups with your fellows for preparations of rehearsals and performances;

3. Prepare timetable for the performance. Make sure the timetable indicates preparation, practices and performance schedule;

4. Rehearse based on the instructions from the teacher. Make sure that you rehearse enough to have a good performance;

5. Prepare the tools needed for the performance. These include costumes, make-up, and props, depending on the performance;

6. As the day of the performance reaches, rehearse in the area that will be used on the day of the performance;

7. On the performance day, make sure everything is well prepared, especially the stage and the props;

8. In case you are using electrical devices, make sure they are tested in advance to see if they are safe and working properly.

FOR ONLINE READING ONLY
www.wazeleimu.com

This activity should be done under the guidance of your teacher, especially connecting to the electrical power sources;

9. After the performance, make sure the area used for the performance remains clean, and all used equipment is removed;

10. Make an evaluation to determine the success or weaknesses of the performance to improve future performances; and

11. Finally, congratulate each other for the work you have done.

Figure 1: *Actors performing on stage*

Activity 1

Perform a 10 to 15 minutes play with a message for the community

Fine art exhibitions

This kind of exhibition at the school level aims to enable a pupil to show the creative works of fine art done for a certain period, for example, a month or a year depending on the type of exhibition. Also, they aim to encourage pupils to participate more in drawing and clay modelling to develop their talents. Likewise, teachers, parents and society in general get a chance to see their children's academic progress. To participate in fine art exhibitions, you should consider the following steps:

1. Choose a display topic that will go with your artwork. Choosing a topic that reflects life in the community you come from is good.

2. Make preparations together with your fellow pupils or performers to come up with appropriate methods for preparing an attractive presentation.

3. Prepare a short timetable that will show the search of the exhibition area, such as at the playground, under the tree, the identification and preparation of the artworks to be exhibited, the arrangement and placement of artworks within the exhibition area, and the date when the exhibition will take place.

4. Prepare the materials or tools to be used for setting up an exhibition area. Some of the equipment are:

FOR ONLINE READING ONLY
www.mazaelimu.com

(a) Small nails;

(b) A large fabric;

(c) Glue;

(d) Tables and chairs;

(e) A pair of scissors;

(f) Razor;

(g) Hard paper;

(h) Hammer; and

(i) Pins.

5. Prepare a list of the artworks selected for display.

   (a) Choose artworks in good balance. Choose a combination of pictures and models in proportion, depending on the size of the area.

   (b) Keep a good record of selected artworks.

6. Hang or place works of art in the display area.

7. Participate in the exhibition by elaborating on the artworks selected for display to the audience.

8. At the end of the exhibition, collect the artwork and clean the area.

Activity 2

Prepare an exhibition of pictures you have drawn and objects you have modelled with clay

Singing performance

Singing performances provide an opportunity for singers to demonstrate their ability to sing in front of an audience. At the school level, these performances are held in a special prepared area. Audience come to watch groups singing special pre-arranged songs. They can also sing as individual singers. These performances aim at educating, entertaining and nurturing talents. People like to

FOR ONLINE READING ONLY
www.wazeelimu.com

attend these performances to enjoy the beautiful voices of singers, the sounds of musical instruments, movements and the messages of various songs. Figure 3 shows singers on stage.

Figure 3: *Singers performing on a stage*

Things to consider when participating in singing performances

When participating in singing performances, consider the following points:

1. Prepare performance rules;

FOR ONLINE READING ONLY
www.wazaelimu.com

2. Select a song for the show. You are advised to choose a song that you like. The song should also have an attractive message that reflects people's lives in the community you come from;

3. Have enough time to rehearse. The rehearsal should involve vocal and singing exercises. If the song is to be sung by a group, practise with your fellow singers. Good preparation makes the singer confident. Therefore, he or she can perform well in front of the audience;

4. Before the performance, arrive early at the performance venue or platform that will be used and do some rehearsals. The rehearsing includes knowing the stage and testing the musical instruments;

5. On the day of the performance, have enough time to rest before the performance time. Also arrive at performance area on time;

6. Be confident with the preparations you have made and avoid showing signs of wanting favours that could lead you into corrupt practices; and

7. During the performance, express the feelings you have about the song confidently as you send the intended message to the audience. If it is a happy event, smile and show your happiness. If it is a sad event, express the mood of sadness with the relevant voice or actions.

Activity 3

(a) Prepare a short song with a message for your community;

(b) Rehearse singing the song accompanied by musical Instruments; and

(c) Perform your song in front of your fellow pupils at school.

Participate in sports competitions

At the school level, sports competitions will involve physical exercises, and traditional and modern games you have practised. The competitions can be between individuals or groups. The competitions provide opportunities for players to show their skills in their respective sports. To effectively participate in sports competitions, you need to consider the following issues:

1. Prepare a play area;
2. Ensure the playing area is clean and safe;
3. Prepare necessary equipment for the respective game;
4. Wear relevant sports clothes;
5. Wear relevant sports shoes;
6. Remove shoes when doing acrobatics;
7. Do exercises to prepare your body before participating in a relevant game;
8. Do exercises to improve your skill level in the respective game;
9. Play while obeying the rules of the game;

Answer all questions.

1. Answer items (i) to (v) by choosing the letter of the correct answer.

(i) What should a singer focus on while singing to achieve the correct tone?

(a) Closing the mouth while singing.

(b) Opening the mouth properly while singing.

(c) Singing without considering the song's tempo.

(ii) Which of the following statements is correct concerning singing in two voices?

(a) The second voice is above the first voice.

(b) The second voice is below the first voice.

(c) The second voice is parallel to the first voice.

(iii) What method is used to shape objects with long forms?

(a) Flat

(b) Squeezing

(c) Coil

(iv) Which of the following exercises can an actor do to express emotions and voice easily?

(a) Breathing forcefully and quickly.

(b) Practicing different word sounds.

(c) Imitating famous people's voices.
